Good Afternoon,

The Leviathan Mine soil PE samples were shipped today and should arrive tomorrow. The FedEx tracking number is 560847661979. Please let us know if you have any questions.

Thanks,

Keith

Subject: Leviathan Mine - PE Sample Coordination

Rich,

This email serves to provide notification of upcoming soil sampling activities commencing in July 2017 at the Leviathan Mine Site in Alpine County, California to assist U.S. EPA with coordination of performance evaluation (PE) samples according to procedures described in the Leviathan Mine Site RI/FS Quality Assurance Project Plan, Revision 2 (Atlantic Richfield, 2017). Sampling activities at the Leviathan Mine Site are highly dependent on area weather and site access in compliance with project health and safety guidelines, and all schedules discussed herein are tentative.

The tentative schedule for upcoming sampling in the 2017 field season is as follows:

- 1) Supplemental Study Area Investigation (RRC) (soil matrix)
 - a. Start Date: July 26, 2017
 - b. Duration: 1 event (2 days)
 - c. Primary quantitative measurements; total metals (aluminum, antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, iron, lead, manganese, nickel, selenium, silver, thallium, vanadium, and zinc)

Atlantic Richfield will make arrangements with the subcontract laboratory to provide appropriate bottles sets for the aforementioned sampling event in accordance with the requirements set forth in the LMS RI/FS QAPP and the attached table of analyses (Table 1). PE samples prepared by U.S. EPA and returned to the designated subcontractor will be appropriately integrated with the concurrent sampling event. All prepared PE sample sets should be shipped to the following address during the appropriate time frame for a designated sampling event:

Britt Jones, AmecFW
931 Bollen Circle
Gardnerville, NV 89460
Ph: (916) 612-6237

Preliminary results from representative samples collected during the 2016 investigation were compiled to provide available information on recent concentration ranges for the specified matrix (Attachment 1). Please contact me directly for coordination of laboratory bottle supplies and preferred delivery dates for PE sample shipments by U.S. EPA, or if you have additional questions.

Best Regards,

Lynda Lombardi
